LeetCode

EDUCATION

Year	Degree / Certificate	Institute	CGPA / Percentage
2022-2025	B.Tech Computer Science	Govt. PG College, Dharamshala	7.7 / 10
2019-2022	Diploma in Computer Science	Govt. Polytechnic Sundernagar	76.62%
2018-2019	Secondary Education (X)	Nops Public School, Ghumarwin	90.14%

EXPERIENCE

Full-Stack Trainee
Softtonia Remote / India

Jan 2025 – May 2025

- Developed a multi-role, authentication-based gaming platform with secure payments and real-time challenge updates using React.js, Node.js, Express.js, and WebSockets.
- Deployed a production-ready application on AWS EC2 and configured Nginx as a reverse proxy to improve scalability and performance.
- Built backend services for an e-commerce platform and validated REST APIs using Postman, cURL, and HTTPie.
- Automated data scraping workflows using Python (Selenium, BeautifulSoup), reducing manual data collection time by over 60%.
- Integrated Python Selenium scripts with Bash/Shell tools (rsync, Linux commands) on AWS to automate and stabilize scraping workflows.
- Configured a virtual display server on AWS to run browsers in non-headless mode, preventing scraping detection and blocking.
- Developed a Bash-based pipeline to execute Python scripts with product ID parameters and automatically clear Chrome cache after each run to ensure stable memory usage.

TECHNICAL SKILLS

- Programming Languages:** Python, JavaScript, Go (Beginner)
- Frameworks & Tools:** React.js, Next.js, Node.js, Express.js, Selenium, BeautifulSoup
- SQL Analytics & Dashboards:** Apache Superset
- Databases:** MySQL, MongoDB
- Cloud / DevOps:** AWS EC2, Nginx
- Other Tools:** Git, GitHub, Postman, cURL, HTTPie

PROJECTS

Golang Blog Platform
Independent Project

2024
GitHub

- First personal project while learning Go, built to gain hands-on experience with Go's standard libraries.
- Implemented a lightweight backend using Go's `net/http` and `html/template` without third-party frameworks.
- Integrated MongoDB Atlas for scalable and secure cloud-based data storage.
- Added LaTeX rendering support in blog posts using MathJax, enabling authors to write mathematical content in Markdown.
- Focused on clean and efficient code design to ensure fast response times and minimal server overhead.
- Gained practical experience with Go concurrency, HTTP routing, and server-side templating.

Woods Indica – E-commerce Website
Minor Project

2024
GitHub

- Developed a full-stack e-commerce website with a React.js frontend and Firebase backend as a college minor project.
- Integrated Razorpay payment gateway with proper transaction verification and error handling.
- Implemented secure authentication, authorization, and protected routes for users and admins.
- Built an admin dashboard with real-time analytics for monitoring users, sales, and inventory.
- Implemented dynamic cart functionality along with product search and filtering features.

- Used React.js with Tailwind CSS for responsive UI and Firebase for real-time database updates.

Shalafood – Food Ordering Website

Personal Project

2023
GitHub

- Built a MERN-based food ordering platform featuring user authentication and role-based access.
- Implemented dynamic menu rendering and real-time cart updates.
- Worked extensively with React component architecture, Express.js APIs, and MongoDB database operations.
- Strengthened full-stack integration and state management skills.

Loan Credit Risk Analysis & Default Prediction

Machine Learning Project

2023
GitHub

- Conducted end-to-end analysis on a credit risk dataset including data cleaning, outlier handling, feature engineering, and exploratory data analysis.
- Trained and compared Logistic Regression, Random Forest, and XGBoost models, achieving a final ROC-AUC of 0.948 using XGBoost.
- Built a FastAPI-based web application with a Jinja2 frontend for real-time loan default prediction.
- Implemented a consistent preprocessing pipeline including one-hot encoding, missing value handling, and feature alignment for production-ready inference.

CERTIFICATIONS & ACHIEVEMENTS

- Full-Stack Development Internship Certificate — Softtonia
- Data Science Beginner (2024) — Scaler Academy
- Advanced Python Certificate — Technology Excellence
- Qualified GATE 2025
- Solved 100+ problems on LeetCode, demonstrating strong algorithmic and problem-solving skills

MISCELLANEOUS

- **Hobbies:** Sci-fi movies, 90s hip-hop, chess, coding challenges
- **Personal Interests:** Robotics, songwriting, learning new technologies
